-

My Projects

Fitness Bd (project-1) | [client site](#) | [live site link](#)

- This is a simple gym center website.
- Without a login or registered user can not see service details. If a user clicks any details button without login, the user will be redirected to the login page.
- There is a carousel banner, services, trainer and footer section also.

Technologies : React, React Router, Bootstrap, Firebase.

Tourism (project-2) | [client site](#) | [server site](#) | [live site link](#)

- This is a kind of travel agency website . Here I used React, Firebase and MongoDB to develop the site .
- Use data from the database . Users can book any tourist spot after login or register.
- User can delete his/her order from My Booking and All Booking.

Technologies : React, Firebase, React Hook Form, Bootstrap, React Router, MongoDB.

Watch Shop (project-3) | [client site](#) | [server site](#) | [live site link](#)

- On this site a new user can register and old users can login by email, password or google.
- If a user is registered he/she can order any products and can manage his order also.
- On the other hand, an admin can manage all users and add new products also.

Technologies : React, Firebase, Bootstrap, Material UI, React Router, MongoDB.

Educational Background :

BA(Hons) : Political Science

COLLEGE : ADARSHA COLLEGE SYEDABAD
